Then join an elite team of professionals at Epic and start ascending your career!

Software Engineer - Flutter

Competencies:

- 2+ years of hands-on Flutter development experience.

- Convert designs and wireframes into high-quality code.

- Proficient in implementing Clean Architecture and MVVM in Flutter.

- Experience in working with Firebase services and Huawei services.

- Proficiency in integrating Restful APIs using Dart and JSON.

- Knowledge of different state management libraries like BloC, GetX, and Provider will be a plus.

- Solid understanding of Git and version control.

- Maintaining software through the product life cycle including design, development, verification and bug fixes.

- Expertise in Flutter animations and creative UI designing (added advantage).

- Experience integrating mobile CI/CD services.

- Experience in Native Android (using Java/Kotlin) & native iOS (using Swift) app development
