

# Software Engineer

We are looking for passionate candidates to join the Sri Lankan operations of an Australian based cutting-edge Technology Company serving both government and private organizations in Australia, England and New Zealand.

This can be a full-time position with the possibility to join the permanent carder based on your performance. We offer an **attractive packages** and **flexibility of working** from home (maintaining social distancing to stay safe and healthy as well as saving commuting time and cost).

## Who are we looking for?

Self-motivated, energetic, creative individuals who can work with minimal supervision and produce high quality results.

## Skill Requirements:

- A Bachelor's Degree in Computer Science, IT or equivalent qualification.
- VB.Net/ C# .Net / API
- Crystal Reports / Infragistics/ PowerBI
- MS SQL / SSMS
- Azure, Azure DevOps / JIRA
- Xamarin Forms will be an added advantage.
- TFVC, Git
- Unit Testing

## Responsibilities

- Client handling and Gather Requirements
- Design and Develop Desktop applications and Web API(s)
- Developer testing and coordinate with the QA team to deliver defect free output.
- Maintain CI/CD pipelines.
- Database Scripting using MS SQL Server
- Designing Crystal Reports
- Documenting the Technical specifications and Requirements
- Maintain the source controls.

If you have **worked with the above skill requirements / areas more than 2 years**, not scared to think out of the box and believe you can make an impact in changing the traditional way of work, then you are encouraged to apply.
