Graduate Trainee — Garment Technology

Driven by curiosity, Brandix is a digital-first company that addresses unmet needs by manufacturing empowered apparel solutions, delivered by inspired people. Our 50-year history is built on life-long relationships with global partners who share our purpose: inspiring a future that drives prosperity for everyone.

The Graduate Trainee - Garment Technology is responsible for all pattern-making related to development until bulk patterns are handed over to the production plant. You are required to ensure the on-time delivery of samples with the correct quality and follow up on sample approvals. Additionally, you must ensure that ordering consumptions are provided for trims and that correctly approved patterns are passed on to the marker maker for fabric consumption.

Responsibilities

- Assist in creating patterns and grading based on customer specifications and grading rules
- Support the pattern-making process from development to bulk approval and assist in handing over final patterns to the production plant
- Collaborate with the Development team to ensure styles are developed using feasible production methods
- Work alongside Technicians, Garment Technologists and Industrial Engineers to maintain quality and technical standards for new styles within the manufacturing process

Qualifications

- A Bachelor's Degree in Textile Engineering or any other relevant stream
- Possess good knowledge of fabrics and the Textile network in the industry
- Possess excellent interpersonal and leadership skills as well as a positive and problem-solving attitude
