Graduate Trainee — Automation & Innovation

Driven by curiosity, Brandix is a digital-first company that addresses unmet needs by manufacturing empowered apparel solutions, delivered by inspired people. Our 50 - year history is built on life-long relationships with global partners who share our purpose: inspiring a future that drives prosperity for everyone.

The Graduate Trainee — Automation & Innovation is responsible for supporting the design, development, and simulation of automation solutions and prototype modules, and assisting in the implementation of innovative improvements in bulk manufacturing to optimize SMV, cost efficiency, and throughput time.

Responsibilities

- Support IE and Technical teams in identifying simple automation opportunities based on samples and sketches
- Assist in designing, testing, and simulating basic automated processes and machinery
- Help ensure automation solutions are delivered on time for sampling and bulk production
- Coordinate with external suppliers and workshops under guidance to meet technical and timeline requirements
- Support project planning, basic cost estimates, and preparation of progress updates
- Follow up automation developments through to bulk implementation with proper handover
- Assist in reviewing seasonal developments and common production operations to improve efficiency and throughput time

Qualifications

- Bachelors Degree in Mechanical/Mechatronics or Electrical Engineering, preferably with a focus on Mechatronics
- Knowledge in 3D Mechanical designing (Solid works designing)
- Good communication skills

 Brandix - Avissawella
